Introduction

The "Advent of AI: Reshaping Criminal Procedure" is a conference organized by the University of Luxembourg, focusing on the implications of artificial intelligence in the realm of criminal law. It is part of the CRIM_AI project, which began in October 2021 and will end in February 2025. The project is funded by the Luxembourg National Research Fund and aims to assess if current criminal procedure laws, particularly those concerning evidence and procedural safeguards, sufficiently address the complexities introduced by AI.

Benefits

The conference serves as a platform for discussing the findings of the CRIM_AI project, bringing together experts from academia, legal institutions, and professional practice. It aims to identify gaps in current regulatory frameworks and propose policy recommendations at both national and international levels. By examining European and international initiatives, as well as responses from various national jurisdictions, the event seeks to provide a comprehensive understanding of AI's role in criminal proceedings and the necessary adaptations in legal procedures.

Conclusion

The conference highlights the ongoing efforts to align criminal procedure rules with the advancements in AI technology. It emphasizes the need for robust policy recommendations to address the unique challenges posed by AI in the legal context. Through collaborative discussions and expert insights, the event aims to contribute significantly to the evolving landscape of criminal law as influenced by AI advancements.
